

ANKITH REDDY KASANI

New York, NY · +1 (839) 201-2827 · akasani@nyit.edu · linkedin.com/in/ankithkasani · github.com/ankithkasani

PROFESSIONAL SUMMARY

Associate Software Engineer with 1.5 years of enterprise Java development at Ernst & Young and a strong computer science foundation (MS Computer Science, NYIT, GPA 3.8/4.0). Proven full software development lifecycle ownership — requirements analysis, system design, Java/Python/TypeScript coding, unit testing, code review, and production deployment — with zero critical defects across 15+ production releases. Hands-on expertise in Java, Python, JavaScript, TypeScript, and React, grounded in rigorous CS fundamentals including Operating Systems, Distributed Systems, and Algorithms. Collaborative communicator who thrives in structured Agile engineering environments and consistently delivers production-quality software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash/Shell
Frontend: React.js, TypeScript, JavaScript, Next.js, WebSockets, Redux, REST API Integration, HTML5, CSS3
Backend & APIs: Spring Boot, Node.js, RESTful APIs, Microservices, OAuth2, JWT, Multi-threading, Object-Oriented Design
Databases: PostgreSQL, MySQL, SQL Server, DynamoDB, Firebase
Cloud & DevOps: AWS (EC2, Lambda, S3, Cognito, CloudWatch, IAM, RDS), GCP, Azure, Docker, GitHub Actions, CI/CD
Tools & Practices: Git/GitHub, IntelliJ IDEA, VS Code, Agile/Scrum, Jira, Unit Testing, Code Review, TDD, System Design

PROFESSIONAL EXPERIENCE

Ernst & Young (EY) — Global Delivery Services

Bangalore, India

Associate Software Engineer

Sep 2022 – Aug 2023

- Architected and delivered **15+ enterprise Java applications** for global financial services clients — owning full SDLC from requirements analysis and system design through Java coding, unit testing, structured code review, and production deployment, achieving **zero critical defects** at go-live across all releases.
- Built and optimized SQL stored procedures and ETL data pipelines supporting high-volume transaction processing and real-time analytics across multi-region relational databases, reducing manual operational latency by **70%**.
- Operated and monitored a distributed fleet of **50+ production systems** at **99.2% uptime**; performed performance profiling, incident triage, and root-cause analysis; authored technical documentation and maintained a comprehensive knowledge base for all application issues and resolutions.
- Drove cross-functional collaboration across engineering, operations, and finance stakeholder teams in **Agile/Scrum** sprints; led structured code reviews enforcing object-oriented design principles, security standards, and software engineering best practices across all releases.

Ernst & Young (EY) — Global Delivery Services

Bangalore, India

Software Engineering Intern

Jan 2022 – May 2022

- Built an end-to-end **Python** machine learning pipeline (TensorFlow, CNN+LSTM) achieving 85% benchmark accuracy; automated data ingestion and preprocessing reducing processing time by **40%**; documented model architecture and presented findings to senior engineering leadership.

PROJECTS

Code Storm — Real-Time Collaborative Platform | React, TypeScript, Node.js,

2024

WebSockets, REST APIs

- Designed and built a full-stack enterprise platform with **React/TypeScript** frontend and Node.js backend featuring sub-second WebSocket synchronization for concurrent sessions, REST API integrations, AI-driven features, and comprehensive end-to-end testing prior to each release.

CryptoSight AI — Full-Stack Cloud Application | Next.js, Python, TypeScript, AWS,

2024

GitHub Actions

- Architected a production full-stack web application with a serverless **Python** backend (AWS Lambda), real-time data ingestion pipelines, JWT authentication via AWS Cognito, and CI/CD deployment via GitHub Actions on EC2.

MT5 Algorithmic Trading System | Python, Statistical Modeling

2024

- Engineered a fully autonomous **Python** execution system with multi-tier signal processing, statistical regime classification, position sizing logic, circuit breakers, and a complete audit trail — live in production across multi-asset instruments.

EDUCATION

New York Institute of Technology (NYIT), New York, NY

Expected May 2026

MS, Computer Science — GPA 3.8/4.0

Relevant Coursework: Operating Systems, Distributed Systems, Data Structures & Algorithms, Software Engineering, Cloud Computing, Database Management, Big Data Analytics

Christ University, Bangalore, India

May 2022

BS, Computer Science

CERTIFICATIONS

AWS Certified Cloud Practitioner · Google Cloud Associate Cloud Engineer · Microsoft Azure Fundamentals (AZ-900) · Machine Learning Specialization – Andrew Ng · Deep Learning Specialization – Andrew Ng
